VERNON, N. Y.

GLADIOLUS BULBS

**WHOLESALE
RETAIL**

In preparing this list of more than three hundred popular varieties we have discarded some of the least desirable of the older and added many of the newer and better ones. We have been able to make substantial reductions in the prices. Should you wish something not listed we probably have a small stock of it or can procure it for you. We do not attempt a complete description of the various varieties but give the predominating colors only.

We make no extravagant claims for our bulbs and do not claim to have the only good ones. They are well grown, well cured and carefully rogued. The stock is practically 100% pure. If through error any should not prove true to name we will replace those proving untrue.

Quotations are subject to previous sale and bulbs are priced per dozen. Six will be sold at the dozen rate. For price per single bulb divide the price per dozen by ten. For price per hundred multiply price per dozen by six. For larger quantities we solicit correspondence. Delivery prepaid at single bulb or dozen rate.

Situated as we are on the main highway between Albany and Buffalo our fields are visited by residents of many states. We extend a cordial invitation to all interested to come and see how we grow Glads and thus form your own opinion as to the quality of our stock. From the fact that many of our customers have continued to order from us annually since our first year in the business we are assured that our stock does well when planted elsewhere. And as our sales have increased regularly from a small beginning until our present planting consists of seven acres we know that our customers tell their friends our bulbs are right.

**G. A. EARL
VERNON, NEW YORK**

A.B. Kunderd (K) —Primrose, cream & blush pink, ruffled	\$5.00
Adelina Patti (L) —Bishops purple.....	2.50

Sirius (K)—Large dark salmon, ruffled.....	1.00
Souvenir (Hol)—Golden yellow.....	2.50
Sweet Orra (K)—Sulphur yellow.....	1.00

CULTURE

The culture of the Gladiolus is so simple as to render it the most satisfactory of garden flowers, thriving and blooming freely with the least care and attention and making a display which for beauty of bloom and brilliancy of coloring is unequalled by any other flower. If you can grow potatoes you can grow Gladiolus. Plant in any good garden soil as soon as the ground is workable up to the middle of June. If several plantings are made at different times the season of bloom will be lengthened. Do not plant in shade of trees or buildings, and do not allow fresh manure to come in direct contact with the bulbs. Use well-rotted manure, commercial fertilizer, wood ashes or bone meal, well mixed with the soil.

Set the bulbs three or four inches deep in rows and about three to four inches between each bulb. Rows about 18 inches apart. Or may be massed in beds about six inches apart each way. If planted in quantity and to be cultivated with a horse make rows 30 to 36 inches apart. Keep soil loose and free from weeds. When cutting flower spike let three to four leaves remain on the plant to allow the bulb to mature properly. Dig bulbs in the fall, cut off tops, and after drying in the open air for a few days store away in a dry, cool but frost proof place in the cellar.

Of all the summer flowering plants, few, if any, have made more rapid progress in popular favor than the Gladiolus.

On account of its good keeping qualities the Gladiolus surpasses all other flowers for cutting purposes, and in order to obtain the utmost pleasure from the blooms you should cut the spikes as soon as the first flower opens on the stalk and place them in vases in the house. A vase of blooms may be kept fresh for a week or more. Not only that but the colors will be brighter and more beautiful when cut than when out in the sunny garden. The Gladiolus is particularly adapted to table decoration. Cut the spike in the morning or evening when the first bloom opens. Change the water daily, remove the withered portions, and cut (on a slant) an inch or so off end of each stem. Every bud will open one by one to the very top.

ABBREVIATIONS

The letter in parenthesis following name of variety indicates the originator or producer, as : (A) Austin, (C) Coleman, (Ch) Childs, (D) Diener, (F) Fisher, (G) Groff, (H) Hoeg, (K) Kunderd, (Kp) Kemp, (L) Lemoine, (M) Miller, (P) Prestgard, (V) Velthuys, (W) Woodruff, (Z) Zeestraten.

AMERICAN GLADIOLUS SOCIETY

Join this society, help boost the Glad game and secure the latest information available through the Official Bulletin. Send your application with \$2.00 to John C. Davis, 77 South Ave., Rochester, N. Y., or we will be glad to forward your application for you.

THE FLOWER GROWER

Is a valuable monthly magazine devoting liberal space to the Gladiolus. Published by Madison Cooper, Calcium, N.Y. Subscription price \$2.00 per year, three years for \$4.50.

MIXTURES

We do not grow in mixture but the identity of some bulbs become lost in handling and to these we add such varieties as will produce a well balanced assortment and sell at the rate of \$3.00 per 100, or 30 bulbs for \$1.00. This is good stock for those who do not care to preserve the names of varieties.
